ALTA
access

ABOUT VERTICAL ACCESS

Vertical Access offers specialized inspection services using industrial rope access techniques.

We team with engineering and architecture firms nationwide for hands-on inspections and testing on structures such as dams, bridges, towers, monuments, and all types of buildings.

Our staff has advanced training and experience in construction technologies, structural engineering, architectural conservation and nondestructive testing. We are all certified by the Society of Professional Rope Access Technicians (SPRAT).

SERVICES SUPPORTING DAM FACILITIES:

- › Special investigations
- › Nondestructive testing procedures
- › Access consulting
- › Condition surveys for facility planning, maintenance, and rehabilitation
- › Installation of monitoring instruments
- › Expertise in concrete, masonry and other dam construction materials
- › Documentation with live-feed video capability
- › Materials sampling
- › Unmanned Aerial Vehicle (drone) surveys

ABOUT ALTA ACCESS

Alta Access is a specialized contractor who performs work at height using industrial rope access (IRA) techniques as a work positioning method.

We have many years of experience in architecture, engineering, historic preservation and construction.

Our capabilities are wide, varied and applicable for both planned maintenance and emergency situations.

SERVICES SUPPORTING DAM FACILITIES:

- › Debris containment netting
- › Work platform installation
- › Temporary stabilization
- › Horizontal lifeline, fall protection, and ladder installation
- › Installation of monitoring and telecommunications equipment
- › Light repair and cleaning
- › Spall removal
