

**PROJECT
PROFILE**

**Castleton Bridge
Castleton, NY**

Bridge owner

New York State Thruway Authority

In collaboration with

Wilbur Smith Associates, Latham, New York office

Bridge description

Steel arch bridge supported on tall (up to 220 feet), slender reinforced concrete piers, at the NYS Thruway crossing of the Hudson River, south of Albany, NY

Scope of work

- assisted the engineer in the inspection and documentation of the concrete piers below the reach of the largest mechanical “snooper” or under bridge unit (UBU) available
